

Introducing: SkyStep™ for the Citation C510 Mustang

SkyWay is excited to introduce a brand new **SkyStep™** designed specifically for the Citation C510 Mustang. The new SkyStep takes full advantage of all we've learned in SkyStep development, and incorporates multiple design innovations. The stylish and lightweight compound curve SkyStep design maximizes your safety in all weather conditions.

Offering enhanced functionality over the original factory cabin step, SkyStep improves safety, utility and appearance at a highly competitive price. Manufactured at Skyway's PMA-approved manufacturing facility in Uvalde, Texas, SkyStep is a highly anticipated upgrade for your Citation Mustang aircraft.

Innovative SkyStep features:

- Precision machined from high-strength aircraft aluminum
- Enclosed back & sides prevents slipping and improves passenger stability and security
- 3 evenly spaced steps instead of 2 for enhanced ease of entry
- Pneumatic cylinder smoothly deploys the lower step, avoid potential injuries to toes or shins
- Mustang step pricing is comparable to the original SkyStep, starting at \$21,000.
