

## **JOB DESCRIPTION: Airframe and Powerplant Technician (A&P) I/II**

### **Location:**

SkyWay-MRO, Garner Field Airport  
122 Howard Langford Drive  
Uvalde, Texas 78801  
[www.skyway-mro.com](http://www.skyway-mro.com)

### **Position Overview:**

SkyWay-MRO is seeking skilled and detail-oriented A&P Technicians to join our maintenance, repair, and overhaul (MRO) team. The A&P Technician will be responsible for ensuring safety and airworthiness of aircraft through expert maintenance, repairs, and inspections. This role involves working on a variety of aircraft and collaborating with a dedicated team to meet customer and regulatory standards.

### **Key Responsibilities:**

1. Aircraft Maintenance and Repairs:
  - Perform maintenance on customer aircraft in accordance with applicable technical data and FAA regulations.
  - Perform inspections, make adjustments and repairs, replace components, and correct any malfunction or deficiency with and without power applied to the aircraft.
  - Access and re-install aircraft components which obstruct the performance of assigned tasks.
  - Adhere to general work requirements.
  - Document work performed per OEM maintenance manual.
  - Assist with fueling/defueling aircraft as required.
  - Assist Avionics Technicians with troubleshooting and repairing aircraft.
  - Assist with repairs on components detached from the aircraft, for example, flaps, ailerons, elevators, rudders, doors, and leading edges.
  - Other Tasks as assigned.

### **Regulatory Compliance:**

- Comply with FAA regulations, airworthiness directives, and manufacturer specifications.
- Complete all required documentation, including work orders, maintenance logs, and inspection reports.

### **Workplace Collaboration:**

- Partner with team members and supervisors to complete projects efficiently.
- Communicate findings, progress, and issues effectively to leadership.

**Safety and Operational Standards:**

- Maintain a safe, clean, and organized work environment.
- Follow workplace safety procedures, including the use of protective equipment.

**Job Requirements:**

- Licenses/Certifications:
  - FAA Airframe and Powerplant (A&P) Certification
- Experience:
  - Minimum five (5) years of aircraft electrical or mechanical system experience.
  - Preferred knowledge of business jets, i.e. Cessna Citation, Gulfstream, Lear 45, etc.
  - Ability to read and interpret engineering documents and repair manuals.

**COMPENSATION**

- Wage commensurate with experience
- Select paid holidays
- Paid vacation
- Medical
- Dental
- Vision
- 401(K)
- Life insurance
- Accidental insurance
- Hospital indemnity insurance
- Critical Illness Plan
- Telemedicine plan
